SUMMARY

Eager data science enthusiast with a solid foundation in statistical analysis and data visualization. Proficient in Python and familiar with Tableau, ready to contribute to impactful analytical initiatives. Aspires to leverage technical skills in a dynamic retail-focused analytics firm.

TRAINING / COURSES

Data Science Specialization

Coursera, completed in 2025.

Introduction to Machine Learning

edX, completed in 2024.

Advanced Data Visualization with Tableau

LinkedIn Learning, completed in 2024.

INTERESTS

Data Science in Retail

Exploring the power of data science to enhance purchasing experiences is a deep-seated interest for me.

EXPERIENCE

Data Analyst Volunteer

Analytics for Non-Profits

📅 01/2026 - Present

📍 Remote

- Streamlined data analysis processes by introducing automated Python scripts, resulting in a 20% reduction in processing time.
- Collaborated with a team of analysts to develop data visualization dashboards using Tableau, enhancing donor engagement.
- Conducted statistical analysis on fundraising data, providing actionable insights to improve non-profit strategies significantly.
- Implemented effective communication skills to present complex data findings at board meetings, cultivating better understanding and direction.

Research Assistant

Texas Advanced Computing Center

📅 06/2026 - 12/2026

📍 Austin, Texas

- Assisted in the development of predictive modeling tools using R, contributing to a research project on climate projections.
- Engaged in data preprocessing and cleaning techniques, improving the accuracy of project datasets by 15%.
- Worked collaboratively with a cross-functional team to design experiments and interpret statistical findings effectively.
- Applied analytical skills to literature review on emerging data science trends, incorporating findings into ongoing research.
